Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 August 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) 17-21 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-6 is/are rejected.
- 7) ☒ Claim(s) 7-16 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

DETAILED ACTION

Election/Restrictions

Claims 17-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected method, there being no allowable generic or linking claim. Election/Amendment was made **without** traverse in Paper No. 9.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 2, applicant should clarify what is meant by the "cap having been stamped onto the outside surface of the proximity switch."

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bartosz et al. [US 5,573,411] in view of DE19528678 and Wright et al. [US 4,614,398].

Regarding claims 1-2 are Bartosz et al. disclose an electrical unit [1] for use with a proximity switch [column 1, lines 10-15].

Bartosz et al. disclose the instant claimed invention except for the specific housing and terminal connection design for the proximity switch and an outer casing surrounding the housing and terminal connection assembly.

DE19528678 discloses a cable electrical unit [1] including a cable terminal part [figure 1] having socket type terminals for receiving the cable mounted with an insulating connecting piece [7] and a housing part [2] for the component to be connected.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the terminal/housing design of DE19528678 with the electrical unit of Bartosz et al. for the purpose of facilitating connection of the cable to the component to be connected.

Wright et al. disclose a cable connection using an outer shell [32] surrounding a housing part and connecting piece using a catch type connection [figure 2].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the outer casing design of Wright et al. with the electrical unit of Bartosz et al., for the purpose of securing the cable with the connection point.

Regarding claim 4, Wright et al. further disclose an end of the outer casing facing away from the switch having a smaller diameter than a portion of the casing facing the proximity switch [figure 2].

Regarding claim 5, Wright et al. further disclose the casing having a portion compressing the cable connection [figure 2].

Regarding claim 6, Bartosz et al. disclose the outer housing including a viewing hole for an led [figure 2].

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bartosz et al., as modified, as applied to claim 1 above, and further in view of Hill [US 3,990,765].

Bartosz et al. disclose the instant claimed invention except for the casing being tapered.

Hill discloses a cable connector assembly having a tapered outer casing [31, figure 3].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the casing design of Hill for the casing of Bartosz et al., as modified, for the purpose of providing better engagement between the cable and connection assembly.

Allowable Subject Matter

Claims 7-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kroll [US 5,062,810] and Wright [US 6,250,963].
